

The Vident International Equity Fund (VIDI) seeks to track the performance of the Vident Core International Equity Index (VIEQX), which seeks to balance risk across developed and emerging economies and emphasize those with favorable conditions for growth.

REGIONAL/COUNTRY ALLOCATION CHARACTERISTICS

RISK BALANCED INTERNATIONAL EQUITY INDEX STRATEGY

VIEQX's rules-based index seeks to balance risk across 39 developed and emerging markets countries, which we believe is a sound strategic framework for allocating capital among non-US equities.

EMPHASIZES COUNTRIES WITH FAVORABLE CONDITIONS FOR GROWTH

VIEQX seeks to improve exposure to countries that we believe have faster growth potential, more productive populations, and potentially lower fundamental risk versus traditional cap-weighted strategies

SEEKS TO REDUCE CONCENTRATION RISK

VIEQX seeks to reduce country, currency, and company concentration risks that can sometimes be typical amongst traditional capitalization-weighted approaches.

SYSTEMATIC AND RULES-BASED

VIEQX seeks to provide a repeatable and transparent approach to selecting international equities.

As of 6.30.2020

Performance quoted represents past performance, which is no guarantee of future results. Investment return and principal value will fluctuate, so you may have a gain or loss when shares are sold. Current performance may be higher or lower than that quoted. Short term performance is not a good indication of the fund's future performance, and an investment should not be made based solely on returns. To obtain performance data current to the most recent month-end, please call (800) 617-0004 or visit www.videntfunds.com/funds/vidi. The fund's total annual operating expenses after fee waiver is 0.59%, see additional information on page 1.

Carefully consider the Fund's investment objectives, risk factors, charges and expenses before investing. To obtain a prospectus download one here www.videntfunds.com/literature or call 800-617-0004. Please read it carefully before investing.

Investing involves risk, including the risk of loss of principal. VID I has the same risks as the underlying securities traded on the exchange throughout the day at market price. Redemptions are limited and often commissions are charged on each trade. Investments in non-U.S. securities involve certain risks that may not be present with investments in U.S. securities. For example, non-U.S. investments may be subject to risk of loss due to foreign currency fluctuations or to political or economic instability and may have additional trading, settlement, custodial and operational risks. These factors and others can make investments in the fund more volatile and potentially less liquid than other types of investments. The Fund may invest in companies organized in emerging market nations which can involve additional risks relating to political, economic or regulatory conditions. The Fund may invest a significant portion of its assets in the securities of companies of a single country or region and therefore it is more likely to be impacted by events or conditions affecting that country or region. The Fund invests in the securities included in, or representative of, its Index regardless of their investment merits. The Fund's performance may be adversely affected by a general decline in the market segments relating to its Index. Small and medium capitalization companies tend to have more limited liquidity and greater price volatility than large-capitalization companies.

The fund's investment advisor is Vident Advisory, Inc. VID I's sub-advisor is Vident Investment Advisory (VIA). Vident Financial owns the index that underlies the fund. The Vident International Equity Fund ETF is distributed by ALPS Distributors, Inc. ALPS is not affiliated with Vident Financial, Vident Advisory or VIA.

Investor shares are bought and sold at market price (not NAV), may trade at a discount or premium to NAV and are not individually redeemed from the Fund. Diversification does not ensure a profit or protect against a loss.

Market Capitalization is the total dollar value of all outstanding shares, calculated by multiplying shares times current market price. Price/earnings is the valuation ratio of a company's current share price compared to its per-share earnings. Price/book is the ratio used to compare a stock's market value to its book value. Price/sales is a ratio for valuing a stock relative to its own past performance, other companies or the market itself. Price/cash flow is the measure of the market's expectations of a firm's future financial health. Vident Core International Equity Index™ (VI-EQX) is an index seeking to balance risk across developed and emerging countries and emphasize those with favorable conditions for growth. Unless otherwise noted, index performance reflects no deduction for fees, expenses or taxes. It is not possible to invest directly in an index.
